

47A - Water Transmission Grid Improvement

Original Project Total Cost: \$ 10,537,000

Total Operating Cost: \$ -

Alternate Project Total Cost: \$ 2,660,000

Alternate Total Operating Cost: No change

Project Description: The project alternate will provide funds to study the most efficient available interconnection, prepare engineering design plans, and begin construction progress on the best one of the alternate interconnections between the West Athens Transmission Line (WATL) and the large diameter transmission line in Prince or Hawthorne. The goal is to have multiple interconnections and funding the alternate will make progress toward the goal.
